

Serious work, *happy* pages.

Six PDF layouts that are fun but professional: a cover, a report, an invoice, an event flyer, a proposal, and the recipe behind all of them.

A very good year for small gardens.

Big numbers in soft, rounded tiles, one highlight color, and plenty of white space. A playful heading on top of a sober grid keeps the data easy to trust.

12,480

trees planted across 41 neighborhoods

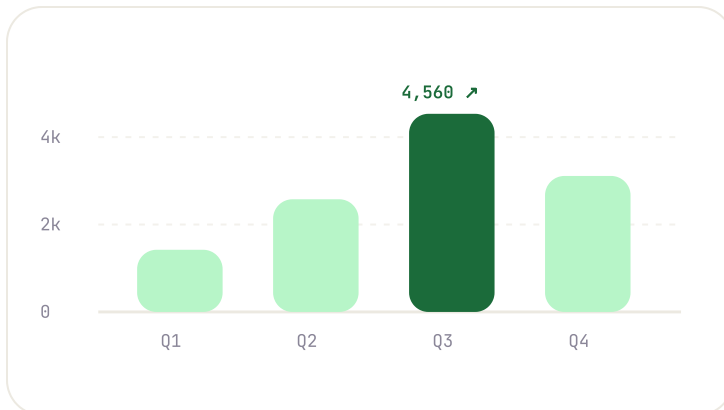

+38%

volunteer hours compared with last year

96

school gardens now run by students

Planting by quarter

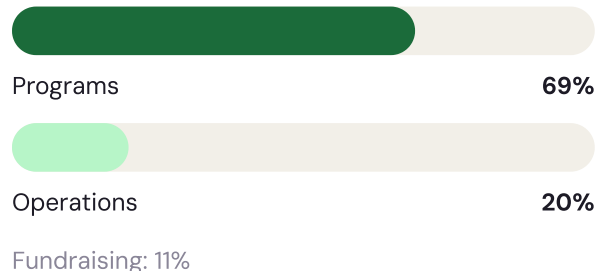

- 01 Opened three new seed libraries in public branches.
- 02 Cut water use 22% with drip lines and rain barrels.
- 03 Paid every intern at least the city living wage.

In their words

My students check on the tomatoes before they check their phones. That is a small miracle.

Ms. Okafor, 6th grade science teacher

Where the money went

Invoice

Hi Maple & Co. Here's what we built together this month. ✨

INVOICE NO.
#0427

ISSUED
Oct 3, 2026

DUE

PROJECT PROPOSAL

Prepared for **Lumen Health**

by Northpaw Design
October 2026

THE SHORT VERSION

A calmer, kinder patient app in 10 weeks, tested with real patients every step of the way.

Making the waiting room *feel less like one.*

A big serif headline brings warmth. The bold sidebar gives the page character, and the timeline keeps it trustworthy.

WK 1-2

Listen

Interview 12 patients and 6 clinicians. Map the moments that cause anxiety.

WK 3-5

Sketch

Three directions, paper prototypes, and a co-design session with your team.

WK 6-9

Build & test

A clickable prototype, two rounds of usability testing, and an accessibility audit.

WK 10

Hand off

A design system, specs, and a walkthrough with engineering.

ESSENTIALS

\$38k

Research, prototype, one test round

OUR PICK

FULL JOURNEY

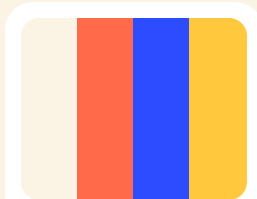

\$54k

Everything above + design system

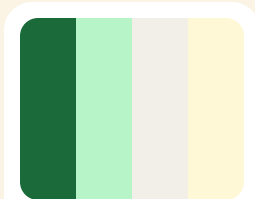

The recipe for *fun* but professional

Every page in this lookbook follows the same few rules. Steal them for your own reports, invoices, and flyers.

Cover · Sunny pop

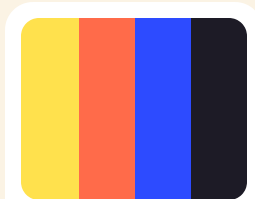

Report · Garden

Invoice · Grape

Event · Night

Proposal · Primary

01

Play with one thing

A big headline, one bright color, or one shape. Keep everything else calm and on a grid.

02

Warm, off-white paper

Cream, lilac, or ink-navy backgrounds feel designed. Plain white can feel like a default.

03

Round the corners

Soft 14–22px radii on cards and chips feel friendly without being childish.

04

Use a mono label voice

Small uppercase monospace for labels and metadata adds precision next to playful display type.

05

Let numbers be heroes

Show key figures large, with tabular digits and a single accent. Readers trust what they can scan.

06

Write like a human

"Thanks for being lovely to work with!" does more for personality than any illustration.

Fraunces

+ DM Sans: editorial and warm. Good for covers and proposals.

Bricolage

+ DM Sans: chunky and modern. Good for reports and events.

Space Grotesk

+ JetBrains Mono: techy and tidy. Good for invoices and docs.
